

International Conference

THE MICROBIOME THROUGHOUT LIFE

Translating new science into clinical practice

19 - 21 March 2026 – Belgrade, Serbia

INA SCHUPPE KOISTINEN

Dr. Ina Schuppe Koistinen is a biomedical scientist and biotech entrepreneur with 25+ years of experience in both pharma and academic research. She leads women's health microbiome research at Karolinska Institutet, focusing on fertility, pregnancy complications, and menopause. Her expertise spans translational medicine, from biomarker discovery to clinical application.

She is co-founder and CEO of Cutis Skin Health Sweden, developing microbiome-based skincare and therapeutic innovations in dermatology.

Ina is also an artist and certified yoga and dance teacher, combining science, movement, and creativity to promote women's health in new ways.
