

International Conference

THE MICROBIOME THROUGHOUT LIFE

Translating new science into clinical practice

19 - 21 March 2026 – Belgrade, Serbia

MARIA CARMEN COLLADO

Maria Carmen Collado holds a degree in Agricultural Engineering and a Bachelor's in Food Science and Technology from the Polytechnic University of Valencia (UPV), where she also earned her PhD in 2005, receiving the Extraordinary Doctorate Award. She completed postdoctoral training at the Functional Food Forum, University of Turku (Finland), and at the Complutense University of Madrid. She is currently a Senior Researcher at the CSIC in the Lactic Acid Bacteria and Probiotics Group at the Institute of Agrochemistry and Food Technology (IATA-CSIC) and has served as an Adjunct Professor at the University of Turku since 2007. Her research focuses on the relationships between the human microbiota, diet, and health, particularly in the maternal–infant context, studying host–microbiota interactions and the factors that influence them, such as nutrition and antibiotics, and their impact on human health.
