

International Conference

## THE MICROBIOME THROUGHOUT LIFE

*Translating new science into clinical practice*

19 - 21 March 2026 – Belgrade, Serbia

## MIRJANA RAJILIĆ-STOJANOVIĆ

Mirjana Rajilić-Stojanović is an Associate Professor at the University of Belgrade and a molecular microbiologist with a cum laude PhD focused on the human gastrointestinal microbiota. She has extensive experience with molecular techniques and bioinformatics, specializing in phylogenetic microarrays, and combines this expertise with an engineering background. Mirjana has held roles ranging from research scientist to assistant and associate professor, and she also works as a freelance data analyst, interpreting intestinal microbiota changes in response to clinical trials. Known for being adaptable, systematic, motivated, and ambitious, her work bridges molecular microbiology, bioinformatics, and applied microbiome research.
