

International Conference

## THE MICROBIOME THROUGHOUT LIFE

*Translating new science into clinical practice*

19 - 21 March 2026 – Belgrade, Serbia

## BELEN GIMENO MOLINA

Belen Gimeno-Molina is a Research Associate at the Sykes Laboratory in Imperial College London. She started her career at the University of Valencia with a BSc in Biotechnology. Later, earned an MSc in Biomedical Biotechnology from the Polytechnic University of Valencia. She completed her PhD in 2023 at Imperial College London at the Sykes/Kropf/MacIntyre lab, where she studied the role of complement and neutrophils in microbial-driven spontaneous preterm birth. As a Research Associate at the Sykes lab, she focuses on the role of infection and inflammation in preterm birth, particularly in microbial-host interactions.
