

International Conference

THE MICROBIOME THROUGHOUT LIFE

Translating new science into clinical practice

19 - 21 March 2026 – Belgrade, Serbia

H. BJØRN NIELSEN

H. Bjørn Nielsen, PhD, Chief Scientific Officer at Cmbio, has since 2008 been a frontrunner in the field of microbiome research authoring a series of noteworthy scientific papers in the microbiome field, counting 21 papers in Nature and Cell journals. Among these is his pioneering work on co-abundance binning for defining metagenomic species, and in 2016 a Nature paper that linked microbiome, serum metabolome and clinical data in pre-diabetic Danes.

Bjørn joined Clinical-Microbiomics (formerly Cmbio) in 2016, where he leads science and innovation, continuously developing new analytical concepts and frameworks together with his team of expert bioinformaticians and biologists. His current focus is on applying machine learning and ultra-high-resolution phylogenetic analysis for biomarker discovery.
