

International Conference

THE MICROBIOME THROUGHOUT LIFE

Translating new science into clinical practice

19 - 21 March 2026 – Belgrade, Serbia

LISA DEROSA

Lisa Derosa is a clinician-scientist and medical oncologist at Institut Gustave Roussy / Université Paris Saclay, whose work explores the interplay between the gut microbiota, immune response and cancer therapy. Her research integrates high-dimensional microbiome data and tumour immunology to uncover how microbial ecosystems modulate treatment outcomes and immune regulation in oncology patients.
