

International Conference

THE MICROBIOME THROUGHOUT LIFE

Translating new science into clinical practice

19 - 21 March 2026 – Belgrade, Serbia

SERGIO GEORGE

Dr. Sergio George, MD, PhD, is a pediatrician and Assistant Professor in the Eastern Department of Pediatrics, Faculty of Medicine, University of Chile, and a Postdoctoral Researcher at the Groningen Microbiome Center, University Medical Center Groningen. His research focuses on the characterization of the gut plasmidome in the large mother–infant Lifelines-NEXT cohort, with particular emphasis on elucidating the functional and ecological interactions of these mobile genetic elements with their bacterial hosts.
